

MOEEZ ALI

Full Stack Developer (MERN Stack)

+92 317-8777371 | moeezali.ismailahmad@gmail.com | Sargodha, Pakistan | GitHub: github.com/moeezali

PROFESSIONAL SUMMARY

Full Stack Developer with 2+ year of professional experience building and shipping end-to-end web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Skilled in developing responsive single-page applications (SPAs), designing and consuming RESTful APIs, and managing NoSQL database schemas. Comfortable across the full development lifecycle — from requirements and UI implementation to API integration, debugging, and deployment. Experienced collaborating in Agile/Scrum workflows with cross-functional teams.

EXPERIENCE

Spark Solutionz · Full Stack Developer Intern

Sargodha, PK · Jan 2026 – Present

- Build and ship full-stack features end-to-end using MongoDB, Express.js, React.js, and Node.js within two-week Agile sprints.
- Design and integrate RESTful APIs consumed by React front-end components, maintaining clean separation of concerns between client and server.
- Debug and resolve frontend/backend issues across the stack, proactively identifying root causes to reduce recurring defects.
- Participate in daily stand-ups and code reviews with senior developers, applying feedback to maintain consistent code quality standards.

AlgoUnion · MERN Stack Developer

Sargodha, PK · Jul 2025 – Jan 2026

- Designed and deployed multiple full-stack web applications — from MongoDB schema design and Express.js API development to React.js UI implementation.
- Built reusable React component libraries and integrated third-party REST APIs, reducing feature development time across concurrent projects.
- Improved application performance through systematic debugging, code refactoring, and query optimization, enhancing reliability for end users.
- Collaborated within an Agile development team, contributing to sprint planning, task estimation, and on-time feature delivery.

Humanatic · Call Analysis Reviewer

Remote · Jul 2022 – Feb 2023

- Reviewed and categorized 100+ recorded customer calls per week against quality guidelines, maintaining high accuracy across all assessments.
- Delivered actionable call-quality insights that helped client companies refine customer service workflows and reduce handling issues.

RISE Academy · Operations Attendant

Sargodha, PK · Jul 2021 – Jul 2022

- Managed attendance, exam administration, and student record-keeping for 50+ students, ensuring accuracy and on-time reporting.

PROJECTS

InvoiceSnap — Micro-SaaS Web Application | React.js · Node.js · Express.js · MongoDB

- Designed and launched a full-stack invoicing SaaS for small businesses — users can create, manage, and download digital invoices within minutes.
- Built a RESTful API with Express.js and Node.js for complete invoice lifecycle management, backed by a MongoDB database for persistent storage.
- Developed a clean, mobile-responsive React.js UI enabling rapid invoice generation without requiring technical knowledge.

E-Commerce Platform — Full Stack Application | React.js · Node.js · MongoDB — am.bemotion.in

- Built a production-deployed e-commerce platform featuring product listings, shopping cart, and checkout flow using the MERN stack.

- Integrated back-end REST APIs for product catalog and order management, delivering a seamless, responsive shopping experience across devices.

Facial Attendance System — *Final Year Project* | *React.js · Node.js · MongoDB · Machine Learning*

- Engineered a facial recognition attendance system using image processing and ML to automate student check-in, eliminating manual tracking.
- Stored attendance records in a structured database and auto-generated reports, significantly reducing administrative reporting overhead.

Inventory Management System — *Internal Office Tool* | *MERN Stack*

- Built a CRUD-based inventory system to track products, stock levels, and transactions — replacing manual spreadsheet-based record-keeping.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design, Single-Page Applications (SPA)

Backend: Node.js, Express.js, RESTful API Design & Development, API Integration, JSON & XML

Databases: MongoDB, NoSQL Database Design, SQL, Database Management

Dev Tools & Methods: Git, Version Control, Agile / Scrum, npm, Postman, VS Code

Programming: Object-Oriented Programming (OOP), Debugging, Problem Solving, Clean Code

AI & Other: Prompt Engineering, Generative AI, Basic Networking, Windows OS Troubleshooting

EDUCATION

University of Sargodha · *Bachelor of Science in Information Technology* Sargodha, PK · Nov 2021 – Jun 2025

Bytes IT Center · *MERN Stack Development (Intensive Program)* Sargodha, PK · Oct 2023 – Mar 2024
